PROFESSIONAL SUMMARY

Java Full-Stack Engineer focused on core banking and microfinance. Develops production applications with Java, Spring Boot, Angular, and MySQL; builds financial workflows and REST APIs; and supports Linux/AWS deployments and Amazon S3 integrations. Experienced in production troubleshooting and translating business requirements into maintainable solutions.

PROFESSIONAL EXPERIENCE

Senior Java Developer
Myanmar Software Integrated Solutions (MSIS) | Yangon, Myanmar
October 2026 – Present

- Lead core banking maintenance and enhancements, designing solutions for complex financial requirements.
- Resolve cross-layer production issues and improve reliability with developers and functional consultants.

Junior Java Developer
Myanmar Software Integrated Solutions (MSIS) | Yangon, Myanmar
June 2025 – October 2026

- Built core banking features, loan/savings workflows, financial calculations, and REST APIs with Java and Spring Boot.
- Delivered Angular features, reports, scheduled jobs, and database updates; supported Linux/AWS deployments and Amazon S3 document storage.

Java Developer Intern
Myanmar Software Integrated Solutions (MSIS) | Yangon, Myanmar
April 2025 – June 2025

- Built foundational Java, Spring Boot, database, and REST API skills while collaborating on application development tasks.

SELECTED PROJECT EXPERIENCE

MFIL | Core Microfinance Platform — Java, Spring Boot, Angular, MySQL, Apache Fineract

- Built client lifecycle, bulk-transfer, office-to-product, and Angular form features; enhanced savings and fixed-deposit processing, GL closure, scheduled jobs, and batch workflows.

MICRO-X by MSIS | Digital Microfinance — Java, Spring Boot, Angular, MySQL

- Delivered loan credit scoring, Excel bulk import, document export, and process tracking; supported deployment and production operations.

Hayman Microfinance | Banking Workflows — Java, Spring Boot, Hibernate, Angular, MySQL, AWS

- Customized savings, fixed deposits, loan accruals, reports, and Close of Business workflows; integrated S3/external services and supported migration and AWS deployment.

Zega Finance — Financial data and reporting

Created reusable data tables and document-export templates, plus operational and accounting reports.
